Century II Variable Universal Life

Footnotes

Kansas City Life's Variable Universal Life (VUL) is a flexible premium life insurance contract designed to provide long-term life insurance benefits. Before purchasing, you should evaluate the contract in conjunction with other insurance policies you own and carefully consider your life insurance protection needs.

Variable life insurance contracts have primarily been used as a way to provide funds for paying estate taxes and final expenses but may fill other personal insurance needs such as providing for gifts to charity or funding trusts for children with special needs. Variable life insurance contracts may also be used to meet a variety of business insurance needs, including buy-sell agreements between business partners, executive bonus plans or key employee insurance.

As long as it remains in force, the contract provides lifetime insurance protection on the Insured until the Maturity Date. You pay premiums for insurance coverage. The contract also provides for accumulation of premiums and a value if the contract terminates. The value during the early years of the contract is likely to be much lower than the premiums paid. The success of your insurance program will, of course, depend on the commitment you make to it through regular and adequate premium payments.

Kansas City Life's Variable Universal Life combines investment features with the many tax advantages found in life insurance. With this one financial product, you have the opportunity to achieve both your protection and investment goals. Tax advantages of the contract include tax-deferred earnings, tax-free transfers and tax-free loans. Flexible premiums, death benefit options and a variety of benefit riders are other features of Kansas City Life's VUL.

A current copy of the Kansas City Life VUL prospectus must accompany or precede this material. The prospectus contains complete information about the contract, including charges and expenses, and should be read carefully before investing. Consider the investment objectives, risks and charges and expenses of the investment company carefully before investing. The prospectus contains this, and other, information and should be read carefully before investing.

Kansas City Life's Variable Life contract owners may invest in one or more subaccounts and the assets are then invested in a corresponding underlying portfolio. Each of the portfolios has a different investment objective which will affect its return and its risk.

The performance data quoted represents past performance and is not an estimate or guarantee of future performance. Your contract value and the actual investment return of the subaccounts will fluctuate in response to market conditions and the specific portfolios you choose so that your contract, when redeemed, may be worth more or less than the amount of your purchase payments. Current performance may be lower or higher than the performance data quoted herein. Please refer to the section of the prospectus entitled "How Your Contract Values Vary" for a description of the relationship between investment performance and contract benefits.

Many of the underlying investment options were active before January 1, 1996, the effective date of the Kansas City Life Variable Universal Life Separate Account. Where applicable, performance includes historical performance for periods before the investment option was available in the product, applying contract charges assessed at the separate account level to approximate the performance the investment option would have achieved inside the Separate Account.

While the Federated Prime Money Fund II seeks to maintain a stable \$1.00 net asset value, there is no assurance that it will be able to do so and it is possible to lose money by investing in the Fund. An investment in this portfolio is not insured or guaranteed by the FDIC or any other government agency.

¹ Rate subject to change. We guarantee to credit at least 4.00% on the KCL Fixed Account. This guarantee is backed by the claims-paying ability of Kansas City Life.

² Performance data represents past performance only. Some subaccounts have experienced high returns due to unusually favorable market conditions that may not continue to exist. There is no assurance that this performance will be repeated in the future.
